

STANDING DISPLAYS

STANDING CONTACTLESS DONATION BOXES

PAYTER

Display stands are popular for guiding your visitors and encouraging spontaneous donations.

Our sturdy standing display units are built to house the Payter device, allowing you to grab the attention of your visitors while you collect contactless donations. Tall and stylish, these displays are designed to make an impact. You can add your organisation branding and any welcome messages and additional information you like.

- No pin required, just tap and go for a fast and safe donation.
- The Payter can still be used offline without a phone signal. It will also store transactions if the mobile signal is weak.
- The Payter can be configured to accept recurring donation requests of whatever amounts you choose, giving you more control over your donations.
- The Payter doesn't need pairing with other devices to work, no logins required.
- The Payter has both LAN and SIM connection to ensure quick processing of transactions no matter where you are.
- The Payter is mains powered and can be adapted with a car battery ion request.

Fitted with a roaming SIM card, you can connect to all major mobile networks. Should you be fundraising at a location with no signal, then the box will accept offline donations – which means that the transaction is stored within the device until signal is regained.
